Qualification Overview

 Our Free Value Adds

This qualification provides learners with the opportunity to obtain broad macadamia production and de-husking processes and practices, including harvesting of macadamias, fertilisation and irrigation of orchards, scouting of macadamia orchards, and de-husking of macadamia nuts.

This will provide the learner with opportunities to grow within any of these fields and develop specialised expertise in macadamia cultivation and processing operations.

Learning Modules

Module 1: Mathematical Literacy

- Apply basic knowledge of statistics and probability to influence the use of data and procedures in order to investigate life related problems
